

Manual trolleys can be mounted at any point of the I-beam. They can be easily adjusted, via a spindle or automatically, to the various beam widths. Manual trolleys are particularly suitable for assembly projects.

Please quote flange width when placing your order.

Load capacity: 1 to 10 t

Manual trolleys					
Load capacity in t	Clamping range in mm	Max. lower flange thickness in mm	Weight in kg	Model	
1	50-220	25	9	Adjustable via spindle
